User guide

Tree glue band - Blue - 5-metre roll

Contents: one 5 m roll and plastic-coated wire ties.
Adhesive barrier for crawling insects. Made in Latvia.

How to fit the band

1. Choose a section of trunk **away from branches and forks** to minimise the risk of birds becoming trapped. Avoid places where birds can perch or reach the band.
2. Position **50 to 120 cm** above the ground, according to the size of the tree.
3. Gently clean the trunk. Fill any gaps with suitable material to prevent insects passing underneath, without damaging the bark.
4. Measure the trunk circumference and cut the band slightly longer to allow the ends to overlap.
5. Wrap around the trunk, peel off the backing paper and leave the **adhesive side facing out**. Overlap the ends and secure with twist ties at the top and bottom edges, without constricting the tree.
6. Consider wind and dust. Check the band and ties regularly; replace when dirty, saturated or no longer effective.

Precautions

Keep out of reach of children and pets. Not a toy. Do not ingest. Avoid adhesive contact with eyes, skin, hair and clothing. Wear gloves when fitting and removing the band. Keep the packaging to identify the product if medical assistance is needed.

If something gets stuck

Skin or objects: gently apply vegetable oil to loosen the adhesive; do not pull. Test first on a hidden area of objects. Afterwards wash skin with soap and water. Do not use solvents on skin.
Non-target animal: do not pull it free. Contact a veterinarian or wildlife rescue. If help is unavailable and it is safe to intervene, use a small amount of vegetable oil on the stuck area, avoiding eyes, nose and mouth. Arrange professional care afterwards: oil can affect feathers and temperature regulation.
Eyes: rinse with clean water and seek medical advice; do not apply oil to eyes.

Disposal of product and packaging

Cardboard box: separate and place in paper/cardboard collection, clean and dry.
Adhesive-coated plastic band: not recyclable; put in non-recyclable waste.
Siliconized backing paper: do not put in ordinary paper/cardboard recycling; check local collection rules and, if no separate collection accepts it, put in non-recyclable waste. Always follow municipal rules. Do not litter.

Storage and contact

Store in the original packaging in a dry place away from heat.
